

GCI Analog SCR House

The Better Alternative for Reliable SCR Houses

GCI has been supplying analog SCR for 20 years. Today we offer cost efficient and reliable SCR "clones" featuring draw out SCR and generator breakers for easy serviceability. PLC controls are also an option on every SCR system we build.

Every GCI SCR system is designed and engineered specifically to rig power needs and includes the same reliable technology that has been servicing the drilling industry all over the world since the early 1970's.

The GCI SCR houses are delivered complete with generator control, plug panel, MCC's Eddy Current Brake controller built by GCI when required and other required equipment. Our experienced and flexible design engineers work closely with the customer and will always comply with specifications.

GCI also offers a complete "electrical rig up package" providing all labor and material for cabling and wiring of generators, drilling motors and connections for all electrical requirements during the rig phase of your rig. A detailed proposal will be customized to fit your specific rig up needs.

GCI's SCR house brings a "classic" solution to your rig power needs, both on and offshore.

If you are looking for an SCR house solution, GCI is simply the better alternative. We bring together world class technology with local assembly, service and support.

The Better Alternative for Reliable SCR Houses

SCR Houses

- Complete SCR Houses
- Small Foot Print
- Robust Design
- Custom Built to Customer Specifications
- Generator Control
- Motor Control Center
- Plug Panel
- Drilling Control
- Redundant Heating/Airconditioning

Turn Key Delivery

- Complete Turn Key Delivery including SCR House, Cables, Transformers, Switchgear etc.
- Project Engineering
- Overriding PLC Control System
- Drilling Enhancement Features
- Remote Monitoring

“GCI brings together world-class technology with local assembly, service and support.”

GCI (Gulf Coast International) was formed in 2003, through the merger of Gulf Coast Electric and Gulf Coast Brake and Motor. Both companies have successfully served the drilling industry since 1987.

The company is specializing in the supply, upgrade, refurbishment and repair of drives, brakes and control systems for the drilling industry.

GCI can offer a unique combination of drill rig know-how and service and support capability with unmatched product offerings utilizing only quality components and drives products.

If you are looking for a new system, upgrade, rebuild or repair, GCI is simply the better alternative.
